### **THE POSSIBILITIES ARE ENDLESS**

With time barriers and knowledge gaps there are a number of facets to consider when undergoing any project, especially if you're a one man show. Fiverr.com provides the platform for your vision to mature. There are a number of services offered, but never limited to.

- Article Writing. Need to bulk up your site or blog, not a problem. Your perfect match is waiting to compose a piece that fulfills all your criteria.
- Get the traffic you need:
  - Social Bookmarking
  - Social Networking
  - Backlinking
  - SEO Optimization. Ranking high has never been so easy.
- Graphic Artists. From visuals that will make your site more attractive or updating your logo whatever your wish is Fiverr.com will satisfy.

At Fiverr.com you can utilize services on a need to basis. What that means? There are no minimum obligations and no project too crazy. This is a one stop shop! Without gouging your bank account you can bring your vision into fruition with a professional website, solid fan base and high quality traffic. All the talent you need is within Fiverr.com

## NAVIGATING THE WEBSITE

You won't find frills on this website; basic interface with easy navigation. Continuing with the relaxed tone Fiverr.com uses words like 'gig' and 'has' (has). So for the amateurs delving into this world I can assure you those overwhelmed feelings will dissipate the moment you log on.

At the end of the day it comes down to results.

There's really nothing to it.

Simply throw in some keywords, click on the category and poof, endless gigs awaiting your approval.

Located at the right hand side is a toolbar that caters to all your search needs in order to find that perfect 'gig'.

1. Categories. This level is very general. I would suggest adding in a few keywords.
2. Keyword Specific. Within each category you'll find there are a slew of sub-categories, so even if you type one keyword you'll narrow your search results immensely.
3. Requesting Gigs. Tailor your request down to microscopic details.

To maximize search results you can sort by 'ratings'. This will make it easier to find a reputable seller. Once you find the person you're looking for just click 'contact seller' to open the lines of communication.

## FINDING THE RIGHT TALENT

This is the most important factor.

Everyone has a different style (but that doesn't mean one is right). To ensure you're finding the ideal match for your projects it's important to take the time to weed through the medley of talent.

Fiverr.com offers a benchmark rating system that gives clients a quick snapshot of what to expect. This tool helps pair down the possibilities into a manageable number.

There are three straightforward stats that each freelancer is measured on. When beginning your search keep an eye out for these points and incorporate them in every project you source.

- Completion rate

- Comments accompanied by a simple thumbs up/down rating (although you might want to scan the comments as there might be tips or watch outs noted by past clients)
- Star Rating

Forget rules and regulations or sites that pigeon hole you into specific categories. People are unique with endless talents. No restrictions except for one simple fact, everything is \$5.

You set the service or product with one guideline, it is just \$5 and that it's. Just because something is out of the ordinary does not mean it is not worthy of \$5.

Clients can also use this platform for seeking long-term commitments. With the immense amount of talent to choose from, all at \$5 a pop, you have the flexibility to test out various individuals in order to find an optimum match.

As a client you are encouraged to read through the comments and have open communication with your potential freelancer.

Feedback is key! This transparency allows little deception.

Competition is fierce. When all jobs are listed at \$5 the best of the best will rise to the top. Add-ons are another aspect to bulk up your resume, and make a bit more money. Listed below each profile you'll find a list of services the seller is offering.

If you've found someone you will likely use again look into throwing a few more jobs their way. You never know they might just provide something you're interested in.

No user (seller or buyer) is required to pay a sign-up fee or membership.

### **BUYER BEWARE**

Being anonymous can be a good thing and a bad thing. Wording can be skewed so there are keywords you must look out for.

For example, when you're looking for someone to backlink your site you want to make sure this is all done manually, not software generated. When searching for talent it's important to use the keyword function to zone in on specific points that could make or break the deal.

There are shady people in this world that will deceive you into thinking you're buying original content or manually generated links, but the risk is low.

You lose five bucks and you move on.

The important thing is to leave feedback! I can't stress enough how important this function is to maintaining the integrity of the site as a whole.

### **IN A NUTSHELL**

This is the ideal platform for those looking to build relationships and a solid portfolio. As a buyer there is an abundance of talent to choose from, but it's like any other hiring process.

Read between the lines, ask questions, and be specific to your requirements. As the seller, write a credible bio, tweak to your buyer needs, and remain open and honest.

Everything about this site is concise and to the point. From seller bios to fees and costs there is nothing more straightforward on the market than Fiverr.com.

So, what are you looking for, credible content for your site, a new logo design, or someone who will simply big your ego up for 20 minutes?

If you have a fiver in your pocket, then this is your site!

The possibilities are endless. You don't have to be a master you just have to be a master planner.

Take care,
